

KEEPING THE PACE WITH EUROPE

Explaining transposition of EU directives into Italian legislation

di *Enrico Borghetto*

Confronted with an increase in size and relevance of the *acquis communautaire* as well as an expansion of EU competences over an ever wider range of policy sectors, the effective implementation of the measures adopted in Brussels within EU member states has become of topical importance in the discussions on the future of the EU. Besides figuring among the top priorities in the EU agenda, the issue of 'compliance', namely the correct and timely fulfilment of their EU obligations by member states, constitutes nowadays an established field of investigation in European studies. This study focuses on the transposition of EU directives into national legislation, the first and at the same time one of fundamental stages in the EU implementation process.
